TARIFF FORMAT

A. Sheet Numbering

Numbers appear in the upper-right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between existing sheets with whole numbers, a decimal is added. For example, the first sheet added between sheets 34 and 35 would be 34.1.

B. Sheet Revision Numbers

Revision numbers also appear in the upper-right corner of the sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised sheet 34 cancels the 3rd revised sheet. Consult the check sheet for the sheet currently in effect.

C. Paragraph Numbering Sequence

There are five levels of paragraph coding. Each level of coding is subservient to the next higher level of coding.

3.4.1. Travel Card Service

AMNEX's Travel Card allows a Customer to access the features and functionality of the AMNEX network from any touch tone phone by dialing an 800 number. Customers are issued a personalized AMNEX Travel Card which contains an Authorization Code identifying them as an AMNEX Travel Card Customer and which is validated at each access to control fraud. After the Authorization Code has passed validation, Customers can select from a menu of basic and enhanced calling features including dialed switched access calling, conference calling, message delivery, and an array of informational services. All travel card calls billed on a per minute basis are subject to a one-minute minimum and are billed in 6 second increments thereafter.

Existing Travel Card Customers are eligible to earn a referral credit for each new Travel Card Customer they refer to AMNEX. Referral credits will appear on the Customer's Travel Card statement at the billing cycle immediately following the issuance of the referred Customer's first bill. Customers can earn referral credits up to a maximum of \$200.00 in any twelve (12) month period.

3.4.1.1 Dialed Switched Access Calling

Customers may use the AMNEX Travel Card to complete dialed switched access calls from any touch tone phone within the state by dialing an 800 number. Upon hearing the tone, the Customer enters the Authorization Code contained on the Travel Card. If the code is authorized, a second tone prompts the Customer to enter the destination number and the call is connected. Customers can select from two rate options. Option A carries a higher rate per minute of use during the Day time period but volume discounts are applied when Day time period usage is \$100.00 or more per month. Option B has a lower rate per minute of use in the Day time period, but no volume discounts. With either option, live operator assistance in placing the call is available for an additional charge.

3.7 Timing of Calls

A. All calls, including "ring-busy" or "ring-no-answer" calls are timed by the Carrier in tenths of a minute unless otherwise stipulated by the Carrier. Customers or Authorized Users will not be billed for uncompleted calls and if charged in error, will be refundable to the Customer or Authorized User. Timing begins at the "starting event" and ends at the "terminating event", unless otherwise specified. Time between the starting event and the terminating event is the call duration. The minimum call duration for a completed call is seven-tenths (0.7) of one minute.

3.7 Timing of Calls (Cont'd)

- C. The terminating event occurs when the Carrier's terminal receives a signal from the local exchange telephone company that either the calling party or the called party has hung up.
- D. All calls are timed from the starting event to the terminating event. Upon access to the Carrier's telecommunication equipment, the call placed is billed from the point it is answered, or if unanswered, from the seventh (7) ring (after forty-two [42] seconds) until CARRIER detects the terminating event. Carrier will give credit for any uncompleted call that is billed inadvertently.

3.7.1. Computation of Distance

- A. All calls are rated on the basis of airline mileage locations of the caller and the called party, regardless of the call's routing.
- B. Airline mileage is obtained by using the "V" and "H" coordinates assigned to each point and contained in AT&T's current tariff on file with the Kentucky Public Service Commission. To determine the airlines distance between any two cities, proceed as follows:
 - i Obtain the "V" and "H" coordinates for each city. The "V" coordinate is the first four digits in the "VH" column. The "H" coordinate is the next four digits.
